

DairyBio Open Day

Hamilton, Victoria | Thursday, 7 September 2017

See for yourself how innovations are changing the way we can identify elite pasture performance and deliver better varieties faster. Hamilton is the site where all the large-scale pasture activities happen for DairyBio and it is the best place to see how new innovations will deliver game-changing increases in pasture yield, persistence and quality.

What will be on display?

- › World's largest precision-planted ryegrass field trial
- › Drones and ground vehicles with advanced sensor technologies
- › Glasshouse facilities with the latest forage innovations
- › Drought-tolerance trials with novel 'rain-out shelters'

DATE Thursday, 7 September 2017

TIME 10.00 am for a 10.30 am start
Concludes at 2.00 pm
Includes lunch

VENUE Agriculture Victoria Research
915 Mt Napier Road Hamilton VIC 3300

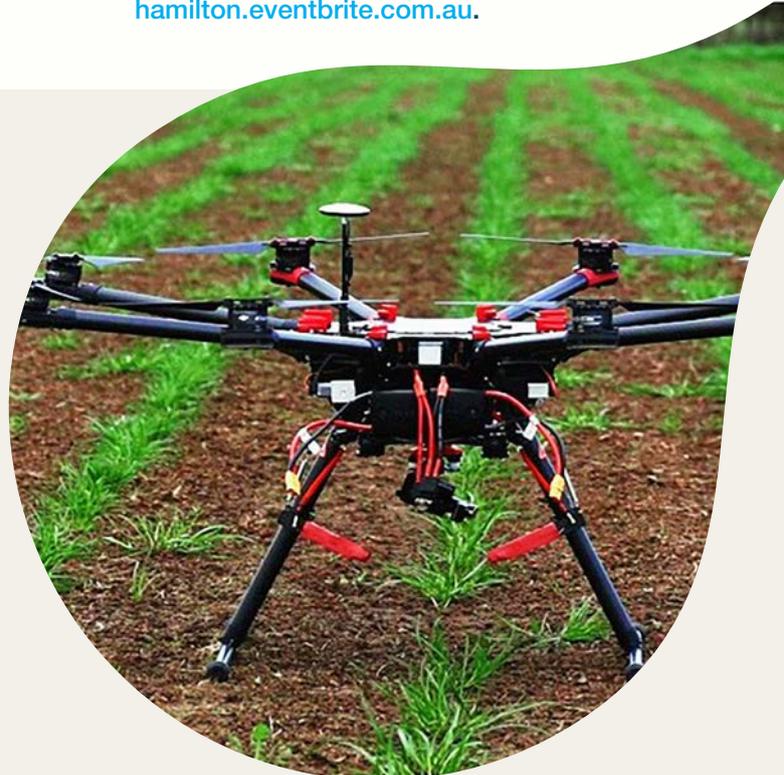

RSVP To reserve your place please register at Eventbrite at <https://dairybio-open-day-hamilton.eventbrite.com.au>.

DairyBio is a \$60 million joint venture initiative between Agriculture Victoria and Dairy Australia and a range of industry partners. The initiative has a focus on dairy bioscience and its application to improve two of the biggest assets on a dairy farm – the pasture and the dairy herd.

DairyBio Open Day- Hamilton Site 7th September 2017

Expression of Interest

Formally known as the Dairy Futures CRC, the DairyBio initiative is a state of the art dairy research collaboration established to deliver large-scale improvements in the performance of pastures and herds through the application of bioscience. Bioscience involves the use of modern tools to study biology on an industrial scale and DairyBio will use these approaches to create practical outcomes for the Australian dairy industry.

The DairyBio Open Day at its Hamilton site will provide the opportunity for farmers and industry stakeholders to engage with this research and participate in communication of research outcomes to their regional peers. DairyBio is providing funding for one farmer from each Regional Development Program to participate in the Hamilton Open day, with funding to include all travel, accommodation and meal expenses. You must be available for travel 6th- 8th September, 2017

To submit your expression of interest for selection as the Dairy NSW representative farmer, please complete the form below and return via email to April Browne (see details below).

Expressions of Interest close at 5:00pm, Wednesday 23rd August with the successful applicant notified shortly thereafter.
